I never like giving bad reviews, but I really want to know what the hell they tried to do with this one. First off, absolutely no music. Just the constant ping of you getting hit and losing health. Second, what am i trying to do in this game. I guess wonder around and collect items that have no importance at all. I guess you can't expect much from a two dollar game or whatever this piece of s*** was but come on. They would have been better off just making this the old metrovania/shooting platformer or something. I really love the fact that games are art and anybody can put their creations out there for others to experience it but I think Steam should really start filtering/weeding out crap games. I would rather go and play some atari games. On a final note, I'm not trying to be negative but don't waste your money on this boring game and also don't believe any reviews that say its good. Its most def. NOT!!!!!!!!!!.

Not very compelling.

Looked like it would be right up my alley.. I like RPGMaker games. This one is quite generic content-wise, but the story and delivery is unique.. Can not get into the game. A cute platformer that pays homage to old NES games. The theme is endearing - I mean you play a pumpkin that spits candy corn... :)

It worked for a while on my machine, (Linux Mint 17.3) then certain items on the menu and enemies in the game were not visible, making one level very difficult and another impossible (hard to dodge enemies you can't see).

Also, the controls are backwards (left to go counterclockwise, right to go clockwise) from what I am used to (e.g. Atari games where you can turn and thrust with the joystick), with no apparent option to change it. Drives me nuts.

Otherwise, I'd give it an enthusiastic +1.. great coop game with good progression in difficulty and fun combat. ez cheevos

1/10. Wow! This actually is a really nice pack. This pack is like the OLD packs they used to release for FPSC that actually would make me excited to get. LOTS and lots of models all decent. Buy this pack if you can get on sale all the better.. fairly short but pretty nice

However, please let us resize the game window. it's pretty freakin small. I'll admit it looks cool but it's just so unoptimized that i just can't play it and i meet the system requirements so please optimize the games and fix the bugs and this thumbs down i will turn the other way around
